Alexey

Python Backend Developer | Mid-level

Kostroma, Russia | Remote
github.com/Middlewarer | eidosacademy.ru

Backend developer focused on REST APIs, integrations and PostgreSQL. Target profile: 3 years of Python development, owning features from estimation through release and production support.

Technical skills

Backend: Python, Django, Django REST Framework, FastAPI, asyncio, Pydantic.
Data: PostgreSQL, SQL, Django ORM, SQLAlchemy, Redis; indexes, transactions.
Integrations: REST APIs, HTTP, JWT, Celery, RabbitMQ, idempotency.
Tools: Git, Linux, Docker, Docker Compose, GitHub Actions, CI/CD, pytest.

Work experience

Python Backend Developer | B2B SaaS Company

Sep 2023 - Sep 2026 | 3 years | Illustrative employment history

B2B platform for user accounts, access management and integrations. Owned APIs, code reviews, releases and log-based troubleshooting.

- Developed REST APIs with **Django/DRF and FastAPI**, including PostgreSQL data models, Pydantic validation, asynchronous integrations and access control.
- Eliminated N+1 queries and tuned indexes using EXPLAIN ANALYZE: **74 to 11 SQL queries** per catalog request and **p95 latency from 920 to 240 ms** under the same dataset and load.
- Implemented background processing with **Celery/RabbitMQ**, retries and error handling; prevented duplicate webhook processing with database transactions and unique keys.
- Reached **87% line coverage** of application backend code with pytest: unit and integration tests for APIs, permissions, duplicate requests and external service failures.
- Set up **Docker and CI/CD** with GitHub Actions, automated tests, migrations and health checks. Reduced a typical release **from 40 to 10 minutes**.

Independent project

EidosAcademy | Creator and developer

eidosacademy.ru | github.com/Middlewarer/EidosAcademy

- Built an educational platform with **Django/DRF, PostgreSQL and React**: course structure, REST APIs, JWT authentication, user accounts and learning progress.
- Added **29 backend and client tests**; configured GitHub Actions CI for tests, linting and frontend builds.
- Configured **5 Docker Compose services**, HTTPS, health checks and persistent storage. Deployed the application to its own domain.

Education

Kostroma State University
Information Systems and Technologies | Bachelor's degree in progress, third year
